Melt the soap base and at the same time melt the shea butter in a custard cup placed in a pan of boiling water or in the microwave. Add calendula petals to the melted base, a few drops of yellow food coloring, the EO and then the melted shea butter. Try to have this the same temp as the melt and pour. Keep stirring the soap/shear butter mixture. As it starts to set up spoon into heart molds. (By spooning you have more control how many of the calendula leaves go into each mold.) I like to let my molds set at room temp until they are skimmed over fairly firm then I chill them in the freezer for about a half hour before removing them from the mold and place them on a rack to finish drying completely.

This is a very pretty soap. Makes 8 heart soaps. Enjoy!!!!

*****By stirring the soap/shear butter mixture as it cools the butter will not float to the top and make little circles of butter which might look like mold to those that don't know.

Store bath salts in a tightly capped container for 2 to 3 days before using. You can also divide the bath salts equally between 2 large bowls, tint them different colors, and then carefully pour them into a clear container, making what appears to be "sand art". scent both containers with peppermint oil, then layer it in a clear container and wrap with red ribbon. This "peppermint stick" makes a great Christmas gift!

Organic sea salt--1 handful
Sweet Almond Oil--2 teaspoons
Rosemary--4 drops
Violet Leaf--4 drops

48. Dry Shampoo

1/2 cup cornstarch
Fragrance oil (optional)

Sprinkle cornstarch into your hair and massage into hair and scalp. Allow it to absorb for a few minutes, then brush through hair. Repeat if necessary. You can also add a couple drops of fragrance oil to the cornstarch for a nice scented dry shampoo.

Green food coloring

Mix all salts and baking soda together. Then combine oil, essential oils, vitamin E and a few drops of coloring in a separate bowl. Add liquid to salts and mix thoroughly. 1 T. Clay
2 T. Jojoba Oil
1/4 Cup Distilled Water
Colorant and Scent

Be sure to mix the clay separately. I put the T. of clay in a dish and spoon a small amount of the melted soap and mix it into a paste, then add it to the soap. This eliminates lumps of clay and makes a nice smooth soap

- 2 drops of food coloring, one blue, one red.
- 9 cups of Sea or Epsom Salt
- 20 drops of Orchid Fragrance Oil
- 8 drops of Vanilla Extract
- 4 drops of Chamomile Essential Oil

Firstly you should mix together the soap, salts and oil in a bowl. Second you will add coloring to fragrance in another bowl, mix them well. You can use more food coloring if you like a richer color. Add color to the salt mixture and stir very well until even colored and scented. Allow salts to sit in the bowl for about 5 hours for the soap and the fragrance to disperse for the best results. After this you can place them in jars with turn fastening tops or cork seals. Make sure the seal is air tight to keep the salts fresh. You can add a teaspoon of glycerin if you live in a very humid area to stop clumping.

Combine the dry ingredients in a bowl and stir until well blended. Drizzle in almond oil and stir until mixture is moistened. Add vitamin E oil and fragrance and stir until well mixed. Take teaspoon size globs of mixture and form into ball shapes with fingers. (Mixture will be VERY crumbly and fragile, so do the best you can. Add a little bit more of the vitamin E oil... I find that helps.) Place the balls on a sheet of wax paper and leave alone for 2 to 3 hours. After 2 to 3 hours, reshape balls. Let the balls air-dry and harden for 10 days. Store balls in a closed container to protect from moisture. To use, plop a ball into your bathtub in warm water!

3 - 4oz. Glycerin Soaps (12 oz)
Food Color
Fragrance Oils (Tangerine, Cherry, Pineapple, Lime, Gingerbread and Cinnamon)

You can use rectangular soap molds, small loaf pans or small bundt pans. Melt 4 ounces of soap and pour into 4 square or rectangular soap molds. Immediately add the following in this order:

Mold 1: 3 drops red food color and 5 drops Cherry fragrance oil

Mold 2: 2 drops red, 1 drop yellow food color and 5 drops Tangerine fragrance oil

Mold 3: 3 drops yellow food color and 5 drops Pineapple fragrance oil

Mold 4: 3 drops green food color and 5 drops Lime fragrance oil

Allow the 4 soap to set completely. Remove them from the molds and cube.

Divide the colored cubes into soap molds. If you are using pans spray with a very light coat of vegetable spray and wipe out with paper towel. Melt remaining soap, when melted stir in 1/4 teaspoon. Gingerbread fragrance oil and 5 drops

Cinnamon fragrance oil. Add 5 drops caramel food color brown paste food color just to create a 'fruitcake' color. Pour soap slowly into molds over the cubes. Set for at least three hours. Just as the soap is starting to set stir them to spread the cubes around. Un-mold. If you have trouble removing them from the pans, use a hair dryer to heat the molds slightly.

1 cup of sea salt (or Epsom Salts)
1 tablespoon of baking soda

3 drops bergamot oil
3 drops rose geranium oil

To color these use light pastel colors, to continue the uplifting feeling. I like light green or yellow personally. Take the oils and mix them together in a separate bowl that you have the salts in. Mix the oils well. Mix the bath salts and baking soda. Add the two together. Store in a clear jar with a cork top lid preferably. These are great for gift giving.

69. Golden Milk Bath

1/2 ounce fragrance oil or 1/2 to 1 teaspoon essential oil, amount depends on oil used.

1 T. herbal powder of your choice
and/or

1 T. dried flower of you choice

Melt the glycerin in the microwave until completely dissolved. This usually takes one to two minutes. Avoid stirring as much as possible because stirring causes bubbles. Pour in herbal powder, dried flowers, and fragrance oil while still in liquid state. Stir lightly to evenly distribute the ingredients. Pour in the mold of your choice and let set for 1 to 2 hours or longer if desired. If you have trouble with the bar releasing from the mold, place in the freezer for a few minutes and the bar should release easily. I have found that the bar of soap lathers better when it is allowed to cure for 3 to 7 days before use. This recipe yields 4 - 4 ounce bars of Glycerin Soap.

chamomile, rose or jasmine. Take the oil and color mixture and stir it into the salts. Cover in bowl for about 30 minutes so that they can mix well. Use 1/4 cup of recipe for each bath, drop into hot running water.

78. Honey Bee Soap

4 oz. Opaque MP soap
1 T. beeswax pellets
1 T. honey

Melt beeswax and keep warm/liquid. Melt soap base and then mix in beeswax. Add honey and keep stirring until melted. Pour into mold. This recipe looks neat in a similar mold - Milky Way Molds have a bee and a flower. I've also seen a great bee/honey mold (it looks like beeswax sheets on the surface) at other places.

79. Honey Egg Shampoo

2 tablespoons liquid soap

84. Jojoba Oil M&P Soap

1 lb. M&P Soap
1 T. jojoba oil

86. Lavender Beeswax Soap

87. Lavender Citrus Soap

2 cups grated soap
1/2 cup water
6 vitamin E capsules
1 T. ground dried lemon verbena leaves
1 T. dried lavender buds
10 drops lavender oil
20 drops sweet orange oil

Melt soap with water. After it has melted, add vitamin E oil and remaining ingredients. After the soap has cooled and thickened, scoop out a small handful of the soap and roll into a ball. Flatten the ball to create a disk shape. As the soap cures, press the soap into a firmer and smoother shape. If you like, mix a little orange oil on your hands and polish the soap smooth. This soap will discolor

if the lavender buds are added too soon to the melted soap. If you do not like the rough surface and the darkened color, omit the lavender buds and add extra lavender oil. Or, after a week of curing, you can slice thin shavings from the soap to smooth it and remove any dark patches.

Now pour the unscented bubble bath or shampoo over the lavender flowers in the jar and then add your 5 drops of lavender oil. Close the lid securely and give the jar a good shaking. Leave the mixture to rest on a sunny window sill for about two weeks. Shake the jar every day while it is sitting and at the end of the two weeks period, you can then strain the mixture through a strainer and then bottle your bubble bath liquid.

10 drops fragrance oil (your choice)
10 drops fragrance oil (your choice, different than choice above)
2 drops different colored food coloring (your choice)

In a heavy saucepan over low heat, melt one bar of glycerin soap until liquefied. Remove from heat and stir in one drop food coloring and 10 drops fragrance oil. Pour half of the mixture into two soap molds, filling each mold halfway. Wait twenty minutes. Melt your second bar of glycerin soap until liquefied. Remove from heat and stir in the other drop of food coloring and fragrance oil. Pour this second layer on top of the first layer (already in molds). Let soap set for three hours or until hardened. 4-ounces MP base
1 tsp. liquid lanolin

9. Uncover the pie pan and spritz the soap with a light layer of rubbing alcohol.
10. Slowly pour the second batch of soap into the pie pan.
11. Help the layers blend slightly by briefly running a knife through the mixture.
12. Allow the soap to harden.
13. Melt $\frac{1}{4}$ pound of soap and color it a dark caramel color. Pour on top of the mold. This will become your pie's crust.
14. Allow the soap to harden.
15. Place the hard soap and mold in the freezer for 15 minutes. This will allow the soap to shrink slightly and then come out of the mold more easily. Some soap bases will not tolerate being placed in the freezer. Wholesale Supplies Plus has a soap base that can be placed in the freezer without damaging the soap.
16. Take the soap out of the freezer and unmold. If the soap is difficult to unmold, turn upside down and run warm water over the mold.
17. Once out of the mold set aside.

- $\frac{1}{4}$ teaspoon bergamot oil

100. Milky Bath Salts

This recipe is different because it combines the beneficial aspects of a milk bath with that of the minerals you can get from using bath salts.

You will need:

4 1/2 cups sea salt
3 cups Epsom salts
3 cups powdered milk
10 drops vanilla
5 drops strawberry
3 drops sweet orange
2 drops rose
(i.e. 9 tablespoons of scent)

To Create these lovely bath salts simply put it all together and shake in a large container. If your jars are not big enough to accommodate such a large recipe than I suggest mixing salts and milk in one bowl, combining the oils in another and then stirring the two together with a metal spoon. These will need to sit about 30 minutes before being placed in jars to let the scent absorb properly. I like to jar these in simple square bottles with a little raffia around the neck fastening the ingredients and name tag. I do not suggest coloring these salts, they look nice as is.

Spray confetti pieces with alcohol and place in mold. Let opaque base cool for a while until a skin has formed twice (you don't want to melt your confetti!). Pour over confetti pieces in mold. This recipe works nice in any tube type mold (try PVC with an end cap!). If you use a tube mold you'll want to make bigger pieces of confetti and pile them up in the mold and pour over, let harden and then slice.

131. Salt Glow

1 cup salt any kind the different sizes give a different feel.
1 cup veggie oil any kind. A lighter one might rinse off more easily.
1 cup liquid soap.

Mix all the ingredients and massage into the skin...use a light touch until you are used to it. Shower as usual. You could scent/color it, but I never bother as my body oil I use afterward is scented.

132. Salt Glow Variation

1/4 cup almond oil
1/4 cup melt and pour glycerin soap
1/2 cup sea salt

Fragrance of choice

Place oil and soap in double boiler and melt gently. Stir well. I used my hand blender to *BRIEFLY* mix the two together so they would be well combined. Slowly stir in sea salt. Once all ingredients are combined well, remove from heat. Add fragrance of choice. It would look pretty colored if you wanted. I took a fork and fluffed up this mixture occasionally as it cooled. It looks like shaved ice and has not separated at all. You could always add instructions to your label that if the product separates to stir well. It is VERY thick and would need to go in wide mouthed jars.

4 T. herbs (pick your favorite!)

2 tsp. essential oil (corresponding with dried herbs chosen)

1/2 pt. distilled water

136. Sinus Headache Bath Salts

2-3 cups Epsom salts (or salts of your choice)

1/3 cup peppermint

1/3 cup spearmint

40 drops peppermint eo

20 drops eucalyptus eo

I ground the mints in my mortar and pestle, then sifted them through a mesh kitchen strainer, and added them to the salts. Actually, I didn't really measure the amount, it was just a good handful of each. This seems to work pretty well for my DH, and if you still need to clear out your sinuses, get a half cup of pepper /spearmint, put it in a bowl, and toss in a cup or so hot water. Let it sit covered for a bit and then carefully start breathing the steam. (I found out how potent this was when I was making peppermint 'tea' for a m&p!!

Use about 1/4 - 1/3 cup of this mixture per bath. My DH and I went through the 'batch' within 2 weeks, but someone suggested to mix the salts and dried herbs beforehand, and when the need for the bath arises, to add the eo's then to guarantee potency. A decent amount would probably be 4 drops peppermint, 2 drops eucalyptus per bath. Some people may be more sensitive to the peppermint, so be sure they don't have an adverse reaction before using these salts.

137. Soapwort Shampoo

2 cups water

1-1/2 tbs. dried soapwort root, chopped (most health food stores carry this)

2 tsp. Lemon Verbena (for a citrus fragrance)... OR

2 tsp. Catnip (promotes healthy hair growth)

Bring water to a boil. Add soapwort and simmer, covered, for about 20 minutes. Remove from heat, add either Lemon Verbena or Catnip, then allow mixture to cool. Strain the mixture, keeping the liquid. Pour into a bottle. Makes enough for 6 or 7 shampoos. Store in a cool, dark place. Must be used within 8 to 10 days.

138. Soap Crayons for Kid's Bath

1 cup soap flakes

1/4 cup boiling water

Spoon some of the soap into different bowls and color each with the food coloring until it has the consistency of thick paste. Press spoonfuls into the ice cube trays and microwave on low for 15 minutes to dry the crayons out. Let them dry at room temperature for several days and give it another day after unmolding. The kids will love these!!

139. Soapsicles

Orange, Green and Blue Food Coloring

You'll need to have Popsicle molds for this one and they are available this time of year in grocery stores, drug stores and places like Target, K-Mart and Wal-Mart. You will also need Popsicle sticks which are available at most craft stores (called craft sticks). Also have on hand a piece of cardboard (the kind they use in shirts is fine) and paper clips. Cut pieces of the cardboard a bit larger but the same shape as the Popsicle mold (round or oblong) and cut a slit in the middle (for the stick). Now divide soap into 4 equal parts (2 oz each), melt one at a time in a small pan over low heat or in a glass cup in the microwave. Add cherry fragrance oil and 2 drops of red food coloring. Stir gently and pour into Popsicle molds. Take one of the cardboard pieces you cut and put a stick thru it, using the paper clip so that the stick stops at the cardboard and doesn't fall all the way thru. Make the rest of the soap sicles in Orange, Lime and Grape (using 1 drop of red and 1 drop of blue food coloring) or make all the same 'Flavor', using 1 Teaspoon of your favorite fragrance oil 'flavor' and 8-10 drops of coordinating food coloring. Put molds in freezer, when frozen remove from molds. Store in cellophane candy bags with a ribbon or a twist tie.

Be sure these are marked NOT EDIBLE

The mixture will be sloppy, so wear a plastic shower cap to protect hair. Even better, use right before shampooing your hair. 156. Truly Homemade Shampoo

Shampoo is just liquid soap, usually made with vegetable oils rather than animal fat, and with glycerin and alcohol added during the soap making process. The basic ingredients for regular soap are lye (potash leached from ashes), fat (animal tallow) or oil, and water. Depending on how basic you want to get, you could even make your own lye and render your own fat, but that's VERY time consuming. Try the following recipe for a gentle homemade shampoo:

2 lb. 10 oz. olive oil
1 lb. 7 oz. of solid-type vegetable shortening
1 lb. coconut oil

10-1/4 oz. lye
2 pints water
1-1/2 oz. glycerin
1/2 oz. alcohol
1-1/2 oz. castor oil

NOTE: You will need a candy thermometer to test temperatures

Mix oils together. Place in a container and set the container in a large pan. Mix the lye solution - pour the lye into an enamel coated container of 2 pints of cold water and stir steadily. When cooled, pour lye solution into a glass container and set in another large pan. Bring both to between 95 and 98 degrees F - this will mean pouring either cold or hot water into the pans, depending on the original temperature of the ingredients.

Add the lye solution to the oils, pouring in a steady stream while continuing to stir. The mixture will turn opaque and brownish, then will lighten. It's ready when its surface can support a drop of mixture for a moment. The consistency should be like sour cream.

Stir in 1-1/2 oz. glycerin, 1/2 oz. alcohol and 1-1/2 oz. castor oil. Add any colorants or scents if you desire.

Now, you can pour the mixture into molds and allow to harden, then make the shampoo as you need it by shaving off flakes and boiling in water until they dissolve - about 1 pound of shavings per gallon of water. Or, you can add more water to mixture, boil, and allow to cool, then place in bottles for use.

157. Vanilla Almond Soap

1/3 cup whole almonds
1 (4 ounce) bar castile soap
1/4 cup distilled water
1 tbs. almond oil
1/8 tsp. vanilla fragrance oil

This soap is great for removing dirt and oil from the skin without drying. Vanilla gives it a delicious fragrance and the ground almonds provide a beautifully textured soap. Grind the almonds to a fine powder in a food processor or coffee grinder and set aside. Shred the soap and set aside. In a heavy saucepan bring the water to a boil; then reduce heat to a simmer. Remove the pan from the heat and add the almond powder, almond oil and vanilla fragrance oil, stirring until well blended. Spoon the soap into a mold and let set for 5 hours or until hardened. 2 tsp. cod liver oil

Melt lanolin and almond oil in a double boiler. Add water and allow to cool. Mix in cod liver oil and comfrey. Apply gently to face and rinse off after 5 to 10 minutes. This is a rich moisturizer that boosts the water-holding capacity of your skin and helps plump out wrinkled areas. Infusion: This is a beverage made like tea, by pouring boiled water over plants and steeping to extract the active ingredients. The normal amounts are about 1/2 to 1 ounce of plant to one pint of boiled water. You should let the mixture steep for 5 to 10 minutes, covered, and strain the infusion into a cup. Decoction: This preparation allows you to extract primarily the

mineral salts and bitter principles rather than vitamins and volatile ingredients. The normal amounts are about 1/2 ounce plant to 1 cup water. Bring ingredients to a boil, then reduce heat and simmer for up to 4 minutes. Remove from heat and steep the mixture with the cover on the pot for a few minutes.

167. Almond Rosewater Body Lotion

1/4 cup rosewater (can be purchased at some health food stores or pharmacies, also carried at most middle-eastern or Indian specialty groceries or specialty cooking stores such as Williams-Sonoma... OR... you can try your hand at making your own rosewater, see recipe below)

1/4 cup glycerin

2 tbs. witch hazel

1 tbs. almond oil

Mix together rosewater and glycerin. Add witch hazel and almond oil. Stir completely to dissolve. Pour into a pretty bottle.

Recipe for rosewater: To prepare rosewater, first gather fresh rose blossoms; do this during the morning, after the dew has evaporated. Place the petals in a glass, stainless steel, or enamel saucepan and cover them with distilled water. Weigh the floating petals down with a heat-resistant glass dish. Place the pan over low heat and allow the pot to release steam for at least an hour. You should begin to see drops of rose oil floating on the surface of the water. Do not allow the water to boil. When the water has taken on a rosy hue, feels thick and soft, and shows evidence of rose oil on its surface, strain the liquid through a tea strainer, using your fingers to press all the liquid from the petals. Store in refrigerator. Rosewater may be used as a skin toner; just apply to the face with a cotton ball. Important Notes: NEVER use rose petals that have been sprayed with any kind of pesticide for making rosewater!! Consider using only enough distilled water to cover the rose petals. Otherwise, the solution becomes more dilute. Please remember to use only the petals, not the sepals, stamens, or green foliated bracket holding the petals in their grouping.

1 cup aloe vera gel
1 teaspoon lanolin
1 teaspoon pure Vit E oil
1/3 cup coconut oil
1/2 to 3/4 ounce beeswax
3/4 cup almond oil
up to 1 and 1/2 teaspoons essential oil or more to prolong scent (I used a combination of lavender EO and rose geranium EO - scent is lovely and is great for skin) Place aloe vera gel, lanolin, & vit E oil in blender or food processor. Place coconut oil & beeswax in 2-cup Pyrex measuring cup, microwave on high 30 seconds, and stir with chopstick. Repeat heating in 10-second blocks until fully melted. Stir in almond oil, reheating if necessary. Run blender or processor at low to medium speed, then pour in melted oils in thin stream as if making mayonnaise. As oil is blended in, cream will turn white and blender's motor will start to grind. As soon as melted oils are added and you've achieved mayonnaise-like consistency, stop motor, add essential oil(s) and pulse-blend. Do not over blend. Transfer cream to glass jars while still warm, as it thickens quickly.

This recipe gives you a basic all -purpose cold cream / moisturizer, which you can add scented oils to, if you'd like. Place the beeswax in a double boiler and add the almond oil. Melt the wax over low heat, stirring constantly to combine the ingredients. Take off the heat and dissolve the borax in the rosewater and slowly pour it into the melted wax and oil, whisking constantly. It will turn milky and thicken, continue whisking while it cools. When it reaches thick pouring consistency, pour into glass jars or china pots. Makes 7 oz.

187. Cream Bleach for Body Hair

Soap flakes
1/2 cup peroxide

188. Creamy Sun-Tan Lotion

3/4 cup (180 ml.) water
3 tea bags (do not use instant tea)
1/4 cup (60 ml.) lanolin
1/4 cup (60 ml.) sesame oil
1/2 teaspoon (2.5 ml.) perfume (optional)

Heat the water to boiling, add tea bags. Leave them to brew for 20 minutes and squeeze them occasionally before removing. Put lanolin, sesame oil and 1/4 cup strong tea into blender. Cover and process at low speed. Remove cap immediately and pour in the remaining tea in a steady stream. Use a rubber spatula to keep ingredients are and the processing blades. Add perfume and give fragrance to the sun-tan lotion. This recipe makes about 1 cup of a soft, tan-colored cream which spreads smoothly on the skin, and gives a sensation of moistness. It dries without feeling sticky. This cream actually repels water and will stay on though swimming. Creamy Sun-Tan Lotion will screen out about half of the burning sun rays while allowing a large percentage of the tanning rays to get through. However, if you burn after 5 minutes of exposure, do not rely on this cream to protect you

189. Creamy Lotion Bar

3 Ounces Cocoa Butter

1 Ounce Oil (I used Coconut)
1/2 Ounce Beeswax

Soften the cocoa butter (in microwave or allow to sit on gas stove where pilot will soften it) Don't melt it. Heat the oil and melt the beeswax in the oil. Using an electric mixer, beat the cocoa butter till fluffy looking, drizzle the oil and beeswax in a slow stream, beating all the while. Continue beating until it is light and fluffy. Spoon into molds. Allow to set for several hours. Wrap in plastic wrap or cellophane candy bags.

190. Creme' de La' Creme!

Group 1 Ingredients:

3/4 cup Fractionated Coconut oil. You can choose any other liquid oil of choice (grape seed, apricot, almond, etc..)

1/3 cup Coconut oil
1 tsp Cocoa Butter
1/2 oz Beeswax

Group 2 Ingredients:

1/3 cup Aloe Vera Gel
1/3 cup Witch Hazel
1/3 cup Distilled Water

Instructions:

Melt group 1 ingredients over low heat in a double boiler. Heat the ingredients just enough to melt them. Pour mixture into a glass measuring cup and let cool to room temperature. Oils should become thick, creamy, semisolid, and cream-colored. Place Group 2 ingredients (also room temperature) into a blender. Turn blender on highest speed. In a slow, thin drizzle, pour group 1 oil mixture into the blender. When most of the oil mixture has been added to the water mixture, listen to the blender, when the blender "coughs" and the cream looks thick, turn the blender off, do not over beat! If there is still a little liquid left, hand beat it in. It will continue to thicken a bit as it sets up. End of recipe I chose not to use a preservative in this as I was just messing around. But If I were to, I would place either vit E, or GSE into the oil mixture when melting. Also, add your own (eo's-fo's) to the finished creme.

191. Crystallized Honey Scrub, Green Tea Rinse

One use for that crystallized honey which no one will eat:

Beforehand, boil 2 pints or so of water -- enough to use for rinsing your face

well. Remove from heat, steep a few handful of loose green tea for 10 minutes. Strain into a large bowl that will fit in your kitchen or bathroom sink and cool to WARM. Then, scoop out honey from its container with a clean narrow spatula. Spread on face with spatula. Massage GENTLY: the crystallized honey "sloughs" or exfoliates beautifully but it can hurt if you're rough. Leave on 20 minutes. Put the large bowl of warm green tea in the sink and splash on to rinse well. Tea can stain your "good" pale towels, so pat dry with an "old" or dark one.

192. CUCUMBER WRINKLE CREAM

1/2 cucumber
1 egg white
2 T. mayonnaise
1/2 C. oil*
* Use wheat germ, olive or avocado oil.

Wash the cucumber, but do not peel. Cube and blend with remaining ingredients. Apply morning and evening, and gently wipe off with tissues.

193. Custom - Scented Body Lotion

1/8 tsp. borax
1/4 cup distilled water
1/2 cup almond oil
1 tbs. grated beeswax
Fragranced essential oil, your choice of scent(s)

Combine borax and distilled water; set aside. Heat almond oil and beeswax together until beeswax is almost melted. Remove from heat and stir. Heat borax and water mixture to almost boiling. Slowly pour water into heated oils while stirring with a wire whisk. Once the water is completely mixed into the oils allow the mixture to cool. Once it is completely cool add the essential oil or oils of your choice for fragrance. Makes about 8 ounces.

194. Cuticle Cream

3 tbs. paraffin
1/2 cup mineral oil
1 tbs. coconut oil
1 tbs. glycerin

Slowly heat paraffin with the oils in a double boiler. Stir until blended. Add in the glycerin and remove from heat. Let cool before using.

195. Dry Skin Lotion

1/8 tsp Borax
1/4 c. Distilled water
1/2 c. Fractionated Coconut Oil
1 Tbs grated beeswax
1 tsp scent (You may want to add this slowly and adjust to suit you)
1/8 tsp lecithin
1/2 c. Aloe Vera Gel Combine water and borax. Bring borax and water almost to boiling.

In a separate pan mix oil and beeswax and heat until wax is melted. Slowly add borax/water to oil/beeswax, stirring briskly, a small wire whisk works perfectly or you can use a hand blender. Add essential oils during the whisking process. Let cool to room temp. Once lotion is at room temp add the 1/2 cup Aloe Vera gel and whisk to incorporate fully into the lotion. Bottle.

196. Excema Cream

8 oz petroleum jelly (one of those biggish jars) 1/4 cup (approx 4 8oz)
beeswax
1 tablespoon lanolin
10-15 drops lavender oil

Rub a little dab into the affected area right after a bath while the skin is still moist (but not wet)

197. Exquisite Refrigerated Lotion Bars

This lotion bar is designed to literally melt into your skin, but not in your hands. It contains moisture rich cocoa butter, along with other luscious oils and butters that leave your skin feeling pampered and refined. Exquisite Refrigerated Lotion Bars are best when stored in the refrigerator. They can be stored at room temperature, but if you keep your home especially warm (or do not have air conditioning in the summer), they are best when kept refrigerated. These bars can be used in place of lotion, or to give someone you love a special massage treat (or, better yet, receive one yourself!!)

Fresh Ingredients
8 ounces Cocoa Butter
1 ounce Shea Butter
1/2 ounce Mango Butter

1/2 ounce Avocado Oil
1 teaspoon Calendula Total CO2
2 teaspoons Liquid Grapefruit Seed Extract
Aromatics (optional)

Place all ingredients except calendula total CO2 and grapefruit seed extract in a double boiler. (You could use a microwave to speed things, but the extreme heat will all but destroy the nutrients in the oils if they are cold pressed.) After the ingredients have melted, remove them from the heat source. Stir with a clean wooden stir stick to ensure the mix. Allow to cool for about 15 minutes. Incorporate grapefruit seed extract and calendula CO2. Stir to blend in. At this time, you may add aromatics; 1/4 ounce at most is usually sufficient. Especially nice ones to use are peppermint, vanilla bourbon, beeswax absolute, oakmoss, patchouli, Bulgarian rose concrete, steam distilled lime peel, sandalwood mysore. Stir to incorporate any aromatics. Pour into molds. I like to use 1-ounce candy tray molds or plastic mini-muffin shapes because they make such pretty treats. (And, of course, these lotion bars always work better when they are pretty!) Place the bars into the freezer for about 20 minutes. Gently release the bars from their mold and allow them to rest for a few hours before wrapping. (yields 10 luscious 1 oz. bars)

198. Floral Cream

1/4 C Distilled water
1/2 tsp. Borax powder
3 T. Grated beeswax
1/2 C Mineral oil
1 tsp. Liquid lanolin
5 drops each, perfume oils: honeysuckle; carnation; mimosa

Boil the water and add the Borax powder, stirring until dissolved. Let this mixture simmer. In a separate heavy saucepan, add mineral oil, lanolin and beeswax, and place over low heat. Stir until the beeswax has dissolved. Pour the oil/beeswax mixture into a bowl and slowly drizzle the simmering water/borax mixture while stirring with a wire whisk. Continue stirring until the mixture becomes a thick, white cream and has cooled to room temperature, approximately 15 minutes. Stir in the perfume oils until well blended. Spoon into a bottle or jar.

199. Hand Cream - All Purpose

3 tbs. mashed almonds
2 tbs. comfrey root (dried)

1 tbs. chopped parsley
1 egg
1 tbs. honey
1 tbs. glycerin

Mix almond meal, comfrey root and parsley in a small bowl and set aside. In another bowl, mix egg, honey and glycerin. Stir in 3 tbs. of the almond mixture. Rub the mixture gently into your hands, letting it penetrate for 20-30 minutes, then wash off with warm water. Refrigerate mixture between uses.

200. Hand Cream

1/4 c. mineral oil **

1/4 c. stearine flakes (used in candle making, I get mine at Michael's)

Put these in a heatproof glass mixing bowl and heat in a pan with water brought to a boil, then lower flame to a simmer. When the liquid is completely clear, remove from water bath. Then mix:

1 c. distilled water

1/2 tsp. baking soda

2 T glycerin

In a measuring cup with a fork or a whisk. Heat this mixture in the microwave for a minute to a minute and a half - don't bring to a boil. Slowly pour the water mixture into the oil mixture, whisking merrily. Have your trusty stick blender OR regular 'mixer' at the ready. After the solution foams up and doubles in volume, mix it with one of the above on HIGH for about two minutes. (I have found this is critical - don't stop mixing too early or the cream will separate later into water and solids). You will thrill at the sight of your cream turning into a wonderful, shiny fluffy cloud - the consistency of 'marshmallow crème'. When thoroughly mixed, set bowl aside, cover and allow to cool. I prefer not to refrigerate as the temperature extremes tend to make your results vary. If desired, when cool stir in a little FO or EO. My most favorite are 'honey almond' FO (smells just like Jergens!) or 'Orange Blossom' FO (Sweet cakes) or Lavender EO. Spoon into jars which have been heat sterilized. This wonderful cream leaves your skin feeling velvety, moisturized, but NOT greasy. (Warning: If you notice a 'watery' texture after rubbing into your skin, you probably didn't blend it long enough - but you can reheat the whole mixture in a water bath and mix again! This has worked for me). Yield: 12 oz.

201. Herbal Cream

The first step in making most herbal creams is to make an herbal oil. The following recipe is for dried herbs. See my note at the end of the oil recipe if you wish to use fresh calendula.

Calendula Oil

Part used: flower

2-3 oz dried herb

1 cup olive oil

(The basic here is enough oil to barely cover your quantity of herbs--fresh or dry)

Put the dried herb into a pyrex, ceramic or stainless steel double boiler (do not use reactive metals such as iron or aluminum) and cover with olive oil. Very gently, heat the oil and herbs for 1 to 2 hours, keeping temperature well below boiling, about 100--150 degrees. Stir often. Heat until herbs feel "crispy" and done (a somewhat intuitive measure, I admit--just use the clock if this is not your style). Strain the oil through a clean cloth into an appropriate container. I prefer using oils to creams and at this point funnel the oil into a bottle with a pour spout for easy use. Always label your products with a complete list of ingredients and date. Note on using fresh herbs: Fresh herbs contain water which can shorten the shelf life of your oil (usually 1-3 years) to a few weeks. If your fresh herb oil will not be used up quickly, the water can be removed by allowing the oil to stand for two weeks without agitation. The oil will then have separated from the water and can be siphoned or poured off into a new, clean container for storage--preferably in a cool, dark place.

202. HERBED HONEY SKIN CREAM

2 tsp. dried mint

2 tsp. dried sage

2 tsp. dried rosemary

1/2 C. boiling water

1/2 oz. beeswax

2 oz. lanolin

1/2 C. wheat germ oil

1 tsp. honey

Combine herbs in a clean bowl. Pour boiling water over herbs. Steep for 10 minutes. Strain through a fine sieve, collecting liquid in a clean bowl. Allow to cool; discard herbs. Melt beeswax and lanolin in a heatproof glass set in simmering water. Stir in wheat germ oil. Add herbal infusion by teaspoonful and stir until well blended. Remove glass from water. Add honey to tepid cream and carefully stir it in until blended. Let cream cool completely. Stir cream thoroughly and transfer it to clean containers with tight-fitting lids. Store up to 3 months. Yields 10 ounces.

1/4 cup vegetable shortening
1 tablespoon ground almonds
1 teaspoon liquid lecithin
2 tablespoons bee pollen
1 egg yolk, at room temperature

204. Honey Cleansing Lotion

$\frac{1}{2}$ cup hot water
1 tablespoon bee pollen

 $\frac{1}{4}$ cup honey
 $\frac{1}{2}$ cup water
 $\frac{1}{3}$ cup glycerin

209. Insect Repellant Cream

1/4 cup pennyroyal-infused grape seed oil
1/4 cup mineral oil
1 tspn coconut oil
2 Tbsp beeswax
1/8 tspn borax powder
1/4 cup distilled water
5 drops lemongrass EO
3 drops citronella EO
20 drops lavender EO
10 drops rosemary EO
10 drops eucalyptus EO
10 drops pine needle EO
20 drops ceda rwood EO

Melt together pennyroyal-infused oil, beeswax and coconut oil. While wax is melting, put distilled water and borax in a pint jelly jar, and microwave for less than a minute, to dissolve borax. When beeswax is melted, pour oil/wax mixture into borax/water mixture, and stir to blend. Add all the EO's, then put the lid on the jelly jar and SHAKE vigorously. Shake, then check, until mixture starts to become a cream (it wont take long). Makes 1 pint.

210. Jasmine Hand & Body Lotion

¼ cup apricot kernel oil
1 tsp. Beeswax
1 tsp. Cocoa butter
1 tsp. Coconut oil
¼ cup distilled water
1 tsp. Aloe vera gel
½ tsp. Glycerin
5 drops jasmine fragrance oil

Melt the butter blend in the oil over low heat then allow to cool. Measure the water, aloe vera gel and glycerin into a deep bowl. Slowly drizzle in a small amount of the oil mixture and beat vigorously with a wire whisk. Continue to drizzle and beat until all the oil is blended into the water. Stir in five drops of jasmine fragrance. Pour into a container, label and enjoy. Variations: Use a flower water in place of the distilled water. Use an herbal infusion, such as Calendula, in place of the distilled water. Experiment with essential oils for different fragrances and therapeutic effects.

211. Jojoba/Aloe Vera Moisturizing Cream

25 g jojoba oil
10 g beeswax
10 g cocoa butter
1 Tbsp vitamin E oil
50 g aloe vera
10 g glycerin
20-30 drops essential oils

Heat jojoba, beeswax, cocoa butter, and vitamin E in a double boiler to 160 degrees F. Mix aloe and glycerin in a second double boiler, also at 160 degrees. Then remove both mixtures from the stove and slowly drop the oil mixture into the aloe/glycerin mixture while stirring. Keep stirring until mixture cools to about 80 degrees F, then add essential oils and bottle.

212. LAVENDER LOTION

1 oz. glycerin
2 tsp. oil of lavender

Put ingredients in a clean glass bottle and shake well. Refrigerate.

213. Lemon cleansing Cream

1Tbsp beeswax
3Tbsp veg oil
1Tbsp witch hazel
1Tbsp lemon juice
1/8 tsp borax
6 drops lemon eo

Over low heat, gently melt beeswax in the veg oil. Beat for 5 minutes until mixture has a creamy, smooth consistency. In a separate pot gently warm witch hazel (I infuse lavender in the witch hazel, good for the skin) and lemon juice; stir in borax until dissolved and add to cream. Beat steadily. After the cream has cooled stir in the lemon eo. Then spoon into jars. This is good for eliminating excess oil and smoothing wrinkles. Plus the lemon gives it antiseptic qualities.

214. Lemon Cleansing Cream (For Oily Skin)

1 Tbsp beeswax
1 1/2 Tbsp Unpetroleum Jelly (available in natural foods stores)
3 Tbsp jojoba oil
1 Tbsp witch hazel
1 Tbsp strained lemon juice

6 drops essential oil of lemon

Melt beeswax and unpetroleum jelly over low heat. Add warmed jojoba oil to wax and jelly mixture, blending for 3-5 minutes. Mix witch hazel and lemon juice, warm gently, mix in borax until dissolved. Slowly add this to the wax mixture, beating until cool and creamy. After completely cooled, add lemon oil, spoon into clean jar.

226. Lotion Bar 10

For bug stuff??? I've also been thinking of putting Eucalyptus and Citronella in them as an EO to help keep the bugs away. Was also thinking they'd be much easier to take camping, too.

Massage Melts
2 tbsp beeswax
2 tbsp cocoa butter
1 tbsp thick honey or 1.5 tsp oil of preference (palm, olive, almond, or even jojoba)
5 - 10 drops of any eo if you prefer

Melt in bain marie (water bath) beeswax and then add honey (or oil) and whisk together and then if using eo add it and combine well. The key to this recipe is keeping the beeswax very hot while mixing. Pour into mold and let set overnight in refrigerator. Honey works very well and leaves no sticky feeling, but if you prefer a softer bar then use the oils.

227. Lotion Bars

4 oz. beeswax
4 oz. shea (use cocoa butter for 1 or 2T of this)
3 oz. oil (avocado, apricot kernel, etc.)
1 oz. grapeseed oil
fragrance or essential oil (optional)

Melt beeswax, then add cocoa butter and shea butter. When it is totally melted, add the oils. Mix well, and pour into a liquid measuring cup and allow to cool a bit. Add some FO or EO to this and pour into molds. If you'd like, you can put in an extra 1 oz. with the main oils and leave out the grap seed oil. All ingredients are by weight.

228. Magic Lotion

In small pan over water melt

3 tabs. safflower oil
1 tabs. lanolin
1 tabs cocoa butter
1/3 cup light mineral oil
1tsp. almond extract or add eos of you like

In a pint jar place

2 tabs. water
1 tabs glycerin
1/4 cup plus 2 tabs. 70% ethanol alcohol
1 drop food or other color

When the oils are cool add to the pint jar and shake. Divide into (2) 6 oz jars. In about half an hour the lotion will separate into 3 different layers. Each one a different color. Shake and it becomes an emulsion, let stand and it separates again. This is really pretty and feels so good.

229. MAYONNAISE FACE CREAM

2 fresh egg yolks
1 C. vegetable oil (sesame,
safflower or sunflower)
1 T. wheat germ oil
1 T. herb vinegar
2 drops perfume or rose geranium oil

Beat egg yolks in cold bowl. Add oil very slowly at first. Beat with rotary beater, mixer or blender. Gradually add more oil. As mixture thickens, add vinegar and fragrance. Beat until thick. Apply to face with upward and outward strokes all over face and throat. Leave on for 20 minutes. Remove with damp cloth. Follow with skin freshener.

230. MILK & HONEY LOTION

(instant conditioner and refresher)

1/4 C. milk or cream

1/4 C. honey

Mix milk (or cream) and honey in a small glass or enamel pan. Warm until the honey melts, then remove from heat. When it is cool enough to tolerate, apply to face and neck (or your entire body if you have time). Let it stand for 15 minutes, then rinse or shower off with warm water. The mix can be made in larger quantities, and it will keep for a week if refrigerated.

231. Mint Body Lotion

1/2 cup mint water (see note below)

1/8 tsp. borax powder

1/2 c. sunflower oil

1 tsp. coconut oil

1 tsp. grated beeswax

3-4 drops peppermint oil (optional)

Mix together the mint water and the borax, stirring until well mixed. Set aside. Mix together the sunflower oil, coconut oil, and beeswax in a glass measuring cup. Place the cup with the oils--beeswax mixture in a pan of water (about 1 to 2 inches of water), making a water bath. Heat over medium heat until the beeswax is melted (8 to 10 minutes), stirring occasionally. When the wax is melted, bring the mint solution almost to boiling (put the glass cup with the mint water/borax in the microwave on High for 1 minute, or use a water bath on the stove top). Remove the oils-beeswax mixture from the water bath. Slowly add mint water/borax to the mixture in the blender and whip). Allow the lotion to cool completely. The consistency may seem a bit thin, but it will thicken as it cools. The lotion will be pale green in color. You may add the peppermint oil now if you wish. Pour the lotion into a clean container with a lid. To use, massage a small amount into your skin. Note: Mint water is made by boiling fresh or dried mint leaves in water and then letting the mixture cool. Strain off the mint leaves. I use 1 cup fresh mint (1/4 cup dried mint leaves) to 1 cup water.

Use only natural, unsweetened, unprocessed juice. To be sure, buy a small bottle of pure juice from a health-food store, or squeeze from fresh pineapple. Drink or eat whatever you don't use for your facial. Or, keep any extra juice tightly capped & refrigerated. 2 Tbls Plain Yogurt
5 drops Chamomile EO
15 drops Lavender EO
3 drops Tea Tree EO
2 slightly heaped Tbls of Bentonite Clay (Powdered, bought at health food store)

Mixed these up and went to take a nice soaking steamy shower. Put on face, arms, torso, and legs. Was tingly, cooling, and felt kinda nice. Let sit for 15.. 20ish minutes, then rinsed off. It left a slight oily residue on my skin, which I can only assume was the buttermilk since the yogurt I used was supposedly non-fat. I've never had the oil residue left from my usual face mask recipe. Finished shower. Skin still felt tingly for a few hours afterwards, but it was a nice sort of tingle. I have somewhat sensitive skin, but not terribly. So far, no pimples or red spots have appeared from this little experiment, and it's 2 days later. I think it was a success. Anyone who wants, feel free to use. I include yogurt and buttermilk because they're two natural sources of alpha hydroxyl acids. If anyone recalls the stories of southern women using buttermilk to keep their skin soft and pale. Well I'm trying it for nixing freckles. We'll see. Store bought AHA lotions have worked so far, but they tend to be a little harsh.

Then I poured it through one of those cone shaped colanders (used for canning) with the pedestal (sp?) that comes to a point at the end. I pushed it through the strainer and then strained it again, this time removing most of the remaining soap particles. Then I measured 1/2 cup of the liquid to use in the Body Polisher recipe. 1 block paraffin wax (about 4 oz)
an ounce of oil
20 drops of essential oil... lavender is rather nice a few drops of olive oil (you will use this to coat your hands) a casserole dish that you have greased with oil before hand plastic sandwich bags

Melt the paraffin, the ounce of oil, the scented oil in a double boiler. Be sure to use a double boiler for safety purposes. Very carefully pour the wax into the dish and wait until a skin has formed on the top of the wax. When this happens, the temperature should be about right for submerging your hands.**But before you do, be sure to test the wax for comfort in case the wax is still a little too warm for your liking. Testing a little on your wrist usually works. Get your hands ready by washing them and then pat them dry with paper towel. Smooth on the olive oil and be sure to cover every inch of your hands and fingers. Dip each hand into the wax repeatedly until you have several layers of wax built up on your hands. Have someone help you put on the sandwich bags onto each hand and then relax for about 30 minutes. For added benefit, place a bath towel over your hands as you wait. This is a perfect time to watch a half hour of tv. Now comes

the time to remove the wax... simply peel it away. Start at the wrist area and pull it down. It should come off in large sections. Give yourself a little hand massage and you are done.

491. "Smelly Jelly" Air Fresheners

1/4 to 1/2 cup AGROSOKE polymer crystals (sold at Walmart, Lowe's, etc...)
Clean water (distilled, bottled or from a water filter)
Food coloring
HIGH QUALITY fragrance oil (that's the key)
Jelly jars and ring tops (Mason makes nice quilted-looking ones in 3 sizes - perfect)
Pretty lace fabric OR very loose-weave fabric cut into squares (4" x 4" or a little larger)

Get a large bowl or pot and put the 1/4 to 1/2 cup of crystals in it. Fill it up 3/4 full with hot water and a few drops of food coloring. Remember - these crystals expand a few hundred times their original size, so pick a bowl large enough! Stir the colored mixture to saturate all the crystals. Wait. Every 10 minutes or so give the crystals a stir. After about 30 minutes all the water should be gone and the crystals should be gel-like. If not, wait some more. It will absorb all the colored water. Next, you can add the fragrance oil to the whole bowl of gel OR you can split it up into separate bowls and scent them separately. You only need a few tablespoons of scent. After you add the fragrance oil, stir well. I make it rather strong so it never runs out of scent. Line up the jelly jars, fabric squares and jar top rings. Add the jelly to the jars almost to the top. Place a fabric square over the top. Screw the jar top ring on to secure the fabric in place. Then pour a tablespoon of water through the fabric top. Do not let the water come out the top. Fill almost to the top only. Lastly, tie a ribbon around the ring if you want to or just leave it as it is. Don't throw away the jar top circles! These are great to use when you don't want to use the smelly jelly right away. Just put these on the jars BEFORE the fabric is added, to seal in the scent. Then take them off and reapply the fabric and rings when you're ready to use your smelly jelly. These last for

months, but remember - water must be poured through the fabric top every week or so to keep them from drying out - very important!! If you happen to forget, they can be brought back from total dry out though. I forgot one and had nothing but crystals and oil in the jar, but I added some water... a few hours later, a perfect smelly jelly!

492. Soapless Hand Cleanser

2 tablespoons honey
2 tablespoons vegetable oil

Melt the wax in a small bowl in the top of a glass or enamel double boiler over medium heat. As soon as the wax is melted, slowly add the oil, stirring gently. Add strained cucumber and blend thoroughly. Remove the pot from the heat and cover with a clean towel. Let the mixture cool very slowly to prevent crystals from forming in the wax. Stir mixture once or twice until cool. When the mixture is completely cool and smooth, store it in a tightly capped glass container in the refrigerator. It will keep for two months. To use, smooth a bit of cream every night around the tender skin of your face and neck.

4-1/2 inch spring form pans

Melt 1/2 lbs white base. Add sufficient coloring to make as dark red as possible, add 2 tsp of Cherry fragrance. Pour at least 30 "cherries" in the mold (it looks like it makes two halves of a 1 inch Christmas ball). Allow to cool, unmold and set aside. Melt 4 oz of clear base. Add 2 drops of green and 2 drops of red colorant. Will turn brown. Add 3/4 tsp of Oatmeal, Milk & Honey Fragrance. Mix in oatmeal. Pour evenly into two of the spring form pans.

Mist brown base with alcohol and pour creamy base evenly into pans - be sure to leave about 1/4 to 1/2 inch head room. Allow to cool about 20 minutes until surface is fairly solid. Spray top of "cake" and bottom of "cherries with alcohol. Arrange about 15 cherries on each cheesecake. Melt 4 oz of clear base. Add red colorant to make deep red, add 1 tsp of Cherry Fragrance. 558. Lemon Cheesecake Soap

Making soap that looks good enough to eat is simple! I accidentally discovered this "cheesecake" recipe when I was making lemon exfoliating soap with cornmeal. I had made it in a square mold and decided to try something new -- cutting it diagonally. Even though my nose told me it was just lemon soap, my mind was envisioning cheesecake! Now you can indulge in cheesecake and not gain an ounce! This soap will make a wonderful gift for any occasion. And it's all done using melt and pour glycerin soap. You'll need the opaque type, which is colored white by the mineral titanium dioxide, and the translucent [clear] kind. The reason for this is that to get a proper cheesecake effect with the 'graham cracker crust', you must be able to seal the corn meal so that it isn't loose. The amount used for this particular recipe calls for a 1 cup mold. Naturally, you can increase the measurements as needed. In fact, if you choose to make slabs of cheesecake, you can either find a round plastic mold, or a triangular mold. Triangular molds will be in at least three parts and are used by ordinary people for storing meals. Soap makers see them a bit differently!

Equipment:

Opaque and Translucent glycerin melt & pour soap, Double boiler, Kitchen scale, Wooden spoon, Cutting board, Plastic soap mold[s], Wax paper, Cling wrap

Ingredients:

6 ounces opaque soap, 2 ounces translucent soap, 1 tablespoon yellow cornmeal, sliver of yellow soap colorant, 10 drops lemon essential oil

Instructions:

1. Slice up the translucent soap and put in double boiler. Make sure the soap is completely melted before adding the scent. Don't put in the cornmeal at this point. Also, it's not necessary to add any colorant-the clearer the better! Lemon essential oil will add a yellow tinge, and translucent soap already has a yellowish color anyway.
2. Pour the glycerin base into the mold. Add the cornmeal. You will have to mix it. Due to the small amount of translucent soap you're crafting, it will dry quickly, so you'll have to stir rapidly. The texture will be similar to that of Farina or Cream of Wheat. You will probably end up using your fingers or the back of the spoon.
3. An advantage to this soap is that you don't have to clean the pot after the first batch if you're not planning to change the color or scent! Add the opaque soap and the colorant.
4. Pour into mold[s].
5. Put in freezer for approximately one hour.
6. Remove soap from mold[s].
7. Cover for at least 4 hours or until the soap has reached room temperature.
8. Wrap the soap in cling wrap.

Other Fragrance/Color Ideas:

Not everyone likes lemon cheesecake. Or you may want to try another color/scent. So for a variety, there's always: plain, strawberry, chocolate, blueberry, lime, or orange. You may want to coordinate your colors for holidays, such as lime for St. Patrick's Day, blueberry for the 4th of July, etc.

Add perfume and give fragrance to the sun-tan lotion. This recipe makes about 1 cup of a soft, tan-colored cream which spreads smoothly on the skin, and gives a sensation of moistness. It dries without feeling sticky. This cream actually repels water and will stay on though swimming. Creamy Sun-Tan Lotion will screen out about half of the burning sun rays while allowing a large percentage of the tanning rays to get through. However, if you burn after 5 minutes of exposure, do not rely on this cream to protect you.

Important Facts

How To Store The Essential Oils?

Store essential oils in brown or dark blue colored glass bottles with a close fitting plastic screw cap. Do not store in plastic containers, they could become contaminated. Keep them in a dark, cool place to prolong the shelf life. Always store out of reach of children.

What Safety Precautions should be taken?

Essential oils are highly concentrated extracts so keep away from the eyes (If oil comes in contact with the eyes, rinse it out with a few drops of pure Sweet Almond Oil, not water. Seek medical attention.) and never take them internally. They should not be applied directly to the skin but mixed with a carrier oil such as mineral oil to dilute them as the oils are in concentrated form. Never increase the dose of essential oil. Some oils are toxic in large amounts.

*NOTE: Do not go out in the sun for at least 6 hours after using any of these oils in your recipes: Ginger, lemon, orange and Bergamot, they can cause skin irritations if exposed to sun.

*Do not use on Pregnant women or children under the age of two.
